Dear Customers,

Welcome to the latest edition of the Aviva Investor!

I am delighted to share with you that amid turbulent times in the stock market; at least ten funds managed by the life insurers, including Aviva, beat the Nifty returns in the last fiscal. This is in spite the last quarter being a challenging one with the Budget announcements and market sentiments remaining subdued for the major part of the quarter following weak economic data and political uncertainty in the country.

The Union Budget was high on inclusion agenda and the Finance Minister announced key steps that will significantly increase the distribution penetration of both the life and general insurance in smaller towns and villages of India. The simplification through uniform KYC norms for banks and insurers, allowing banks to act as insurance brokers and allowing banking correspondents to sell micro insurance products will be a huge step towards expanding the insurance distribution network across India.

At Aviva, we keep your feedback at the heart of our business and design products that address your specific needs. Our market research unveiled that some of you preferred lump sum payouts as opposed to yearly payouts to help them meet specific financial objectives like buying a house, child's education/marriage, and retirement. Through the recently launched Aviva Wealth Builder we aim to help you achieve this objective and also provide peace of mind to the family by ensuring financial security in case of any eventuality. In addition we have also introduced the online version – Aviva i-shield - of our popular term with return of premium plan.

In line with our strategy to use technology to enhance customer service, we launched two new functionalities on our website to help you in the application process for our online products - Click to Call and Click to Chat.

I would also like to take this opportunity to inform you about International Day for Street Children. We celebrated this on April 12th with Breakfast Fundraisers across the country and globally as part of our Street to School programme. This is the third year of our support and the purpose of the day is to raise awareness of the issue of street children around the world and to campaign for their rights to be recognized. By associating ourselves with this day, we are also showing our support and broader commitment to creating long-term, sustainable change for these children.

We always look forward to your feedback.

Regards
TR Ramachandran
CEO & MD, Aviva India

Indian equity markets closed lower after being highly volatile in the January-March quarter. Markets largely ignored the positives such as repo rate cuts by the RBI and decline in WPI and remained subdued for the major part of the quarter, following weak economic data and political uncertainty in the country. While, foreign fund inflows started off strong during the quarter, there was a sharp drop in FII inflows in March. This was led by flow back of funds towards developed markets led by increased uncertainty in the Euro Zone. Both the Union Budget and the Railway Budget 2013-14 fell short of market expectations. Markets also reacted adversely, following dismal GDP growth projection by the Central Statistical Office (CSO). However, the Government's decision to postpone the controversial General Anti-Avoidance Rules (GAAR) till April 2016 restricted the losses to some extent. The key benchmark indices, S&P BSE Sensex and CNX Nifty, fell 3.04% and 3.77%, respectively during the quarter amid sharp correction in Mid-Cap and Small-Cap stocks. S&P BSE Mid-Cap and S&P BSE Small-Cap indices fell 13.65% and 21.35% during the quarter, respectively.

The quarter began on a positive note after the U.S. successfully averted the fiscal cliff. Markets reacted positively after technology giant, Infosys, reported better-than-expected profit for the December quarter. Markets rose further after WPI inflation numbers for December eased to its lowest level in 11 months to 7.18% in January, raising expectations of rate cuts by the Reserve Bank of India (RBI). The Government's decision to partially de-regulate diesel prices aimed at reducing oil subsidy burden and reducing fiscal deficit, also supported markets. Stocks continued to gain after global credit rating agency, Moody's Investors Services, retained Baa3 sovereign credit rating on India with a stable outlook, citing potential for growth, healthy domestic savings and a dynamic private sector. Meanwhile, as expected, the central bank cut Repo rates by 50bps during the quarter, 25bps in Jan 2013 and 25bps in Mar 2013. However, in its policy statement it mentioned that there was limited headroom for aggressive rate cuts in future due to high food inflation and swelling current account and fiscal deficits, which made investors apprehensive.

A series of domestic factors witnessed during the middle of the quarter pushed the markets lower. A survey by HSBC showed that manufacturing output grew at its slowest pace in three months in January. The CSO's projection of 5% GDP growth for 2012-13 also dampened investor sentiments. Markets also reacted negatively after Moody's Investors Service said that India's widening current account deficit and external debt will expose the country to global financial volatility. The markets reacted negatively to the Union Budget 2013-14 on concerns of whether the Government would be able to stick to the fiscal deficit targets and also as the Budget failed to touch upon any measures for revival of growth. Confusion regarding the Double Taxation Avoidance Agreements (DTAA) also kept the markets volatile.

Indian equity markets remained under pressure during the month of March as concerns over European debt crisis resurfaced and political uncertainty in the country hit investor sentiments. Uncertainty over Cyprus' bailout plan raised concerns of a contagion effect on the Euro Zone. The markets were partly soothed after Cyprus sealed a \$13-billion deal with Troika, which included the European Central Bank, the European Union and the International Monetary Fund. Markets witnessed broad-based selling in metal and mining stocks after China tightened mortgage rules to cool the property markets. Markets continued to fall amid political uncertainty in the country after the DMK, a key ally of the ruling coalition decided to pull out of the Government. Moreover, the Reserve Bank of India's statement that the scope for further monetary easing remains limited in the near term triggered heavy selling.

Foreign Institutional Investors (FIIs) continued to remain net buyers in the equity segment during the quarter. FIIs Inflows stood at Rs. 54,751 crores for the quarter, with the majority these flows coming in during Jan and Feb 2013. The inflows tricked down significantly in March led by the Global uncertainties, with funds flowing back to developed markets.

On the sectoral front, majority of the S&P BSE indices closed in red, except S&P BSE IT and TECK, which rose 21.07% and 13.74%, respectively. Metal, Capital Goods, Realty and PSU were the major laggards. Rate-sensitive stocks fell on uncertainty over further rate cut.

Outlook:

There are green shoots visible in the Indian economy led by bottoming out of inflation which will lead to further decline in interest rates, triggering a recovery in corporate capex. Fiscal deficit is also expected to decline going forward led by the fuel reforms, supported by lower crude oil prices, resulting in lower subsidy bill for the Government. This would leave more room for increased Government spending in core sectors such as infrastructure, going forward. Similarly, current account deficit is also expected to be reigned in with the lower oil import bill, measures taken for reducing gold imports and a revival in exports. These factors are expected to result in a recovery in growth going forward. However, concerns related to the Euro zone coupled with slowdown in China and political uncertainty in India is likely to keep markets volatile in the near-term. The second half of the Budget session in Parliament will begin on April 22. It remains to be seen whether the Government can go ahead with ongoing reforms measures. Quarterly results, especially of IT companies, will start coming from mid-April. In the near term, the markets will take cue from the corporate earnings numbers along with the management outlook as it would set the tone for the earnings growth for FY14 as well.

Bond yields fell in the first week of March on hopes that the central bank will cut interest rates in its mid-quarter monetary policy review. Improving cash conditions, as seen by a sharp drop in banks' borrowings from the central bank supported debt markets initially. However, later during the month, yields rose to their highest level in two-and-a-half months on better-than-expected Index of Industrial Production (IIP) data and higher Consumer Price Inflation (CPI) numbers. It rose further after the Reserve Bank of India (RBI) in its monetary policy review said there is limited room for further rate cuts. Political uncertainty in the country also kept sentiments weak. Moreover, the central bank's cautious outlook overshadowed its planned debt purchases of Rs. 10,000 crore via Open Market Operations (OMO), which was largely expected, given the tight liquidity condition. In the last week of the month, yields started rising again after a major coalition partner of the ruling UPA pulled out of the Government.

During the quarter, bond yields moved down although towards the end it moved up and there was pressure to sustain the rally which was witnessed during the quarter. The yields moved down on expectation of rate cuts by central bank and the momentum sustained due to a 50 bps rate cut during the quarter. The Government's increased effort to control the fiscal deficit was well received by the markets. Some of the key measures to control the deficit were seen in the form of increasing railway fares, raising import duty on gold and successful disinvestment in key entities. Bond yields fell after the Government cancelled the last scheduled debt auction for FY13. Yields on 10-year benchmark ended the quarter at 7.95%, compared to 8.05% at the end of the last quarter. Yields touched a low of 7.80% during the March quarter.

Banks' net average borrowings from the central bank's Liquidity Adjustment Facility (LAF) stood higher at Rs. 1,03,649.25 crore during the quarter compared to the previous quarter's average figure of Rs. 82,605.64 crore. To ensure adequate credit flow to the productive sectors of the economy, the central bank reduced CRR by 25 bps, which infused primary liquidity worth Rs. 18,000 crore into the banking system. To improve cash deficit in the system, the RBI conducted bond buybacks through open market operations (OMOs) of Rs. 38,000 crore during the month. Moreover, the RBI eased banks' margin requirements for borrowing under its repo window in a bid to help the lenders tide over the cash crunch. Under the central bank's Liquidity Adjustment Facility and Marginal Standing Facility, banks will be able to pledge their Government Bonds and Treasury Bills with a margin requirement of 4% against the current norm of 5%.

During the quarter, the RBI reduced the benchmark repo rate by 50 bps and accordingly reverse repo, determined with a spread of 100 bps, stood at 6.50% while the Marginal Standing Facility (MSF) and bank rate stood at 8.50%. The central bank also decided to reduce the Cash Reserve Ratio (CRR) of scheduled

banks by 25 bps to 4.00% from 4.25% of their Net Demand and Time Liabilities (NDTL). The cut in CRR infused Rs. 18,000 crore into the banking system.

India's Gross Domestic Product (GDP) slowdown deepened in the October-December quarter, expanding by a disappointing 4.5% on an annual basis, hurt by a slowdown in agriculture, mining and manufacturing. A growth rate below 6% for the last four quarters and subdued IIP numbers along with higher twin deficits (fiscal deficit and current account deficit) indicate a poor state of the economy. But the central bank's stance on interest rates and falling trend of Wholesale Price Index (WPI) numbers hint at a possibility of reversing this trend.

The Wholesale Price Index (WPI) based inflation stood at 6.84% for the month of February against last month's reported figure of 6.62% (provisional) and same period last year's figure of 7.56%. After four consecutive months of decline, WPI numbers inched up in February. The headline inflation picked up on higher fuel costs, which rose to 10.47% during the month under review from last month's reported figure of 7.06%. Fuel inflation also increased after four consecutive months of decline. Rising food and fuel prices are preventing a sharper drop in the headline inflation. However, core inflation, which excludes volatile food and fuel prices, has been easing since September 2012. This prompted the central bank to cut rates in its mid-quarter monetary policy review. In the policy review, the central bank said that easing of global commodity prices helped the prices of non-food manufacturing products to soften. However, retail inflation still hovers at a much higher level. In February, combined Consumer Price Index-based Inflation (CPI) stood at 10.91%.

The industrial output for January moved into positive territory and stood at 2.36% on a Y-o-Y basis, against last month's revised figure of (-) 0.50%. The cumulative growth for the period of April-January 2012-13 stood at 1.0% against 3.4% recorded in the corresponding period last year. Eight core industries witnessed a slower growth of 3.9% in January 2013, against 2.2% growth recorded in January 2012. Manufacturing activity has been squeezed by high borrowing costs and a slowing economy.

Outlook

The overall sentiment is likely to remain bearish as fresh supply will hit the markets in the first week of the new financial year. The twin deficits continue to pose serious challenges to the domestic economy. There are some signs of consolidation on the fiscal front, but CAD levels continue to rise. As it is one of the considered indicators in the RBI's policy, it seriously limits the central bank to ease policy rates aggressively. With no major trigger visible in the month of April, yields are expected to remain range bound and can take directional cues from political developments in New Delhi. The RBI will conduct auctions of dated securities worth Rs. 45,000 crore and Treasury Bills worth Rs. 50,000 crore in April.

Disclaimer

Insurance is the subject matter of solicitation. For more details on risk factors , terms & conditions, please read sales brochures carefully before concluding a sale. Past returns are not indicative of future performance. Unit-Linked Life Insurance products are different from traditional insurance products and are subject to risk factors. The premium paid in unit-linked life Insurance policies are subject to investment risks associated with capital markets and the NAVs of the units may go up or down based on the performance of the fund and factors influencing the capital market. The insured is responsible for his/her decisions. Aviva Life Insurance Company India Limited is only the name of the Insurance Company and the various funds offered under this contract are the names of the funds and do not in any way indicate the quality of the contract, its future prospects or returns. Please know the associated risks and the applicable charges, from your Insurance agent or the Intermediary or policy document or the insurer. The premiums and funds are subject to certain charges related to the fund or to the premium paid and there is a possibility of increase in charges. The various funds offered under this contract are the names of the funds and do not in any way indicate the quality of these plans, their future prospects and returns. Unit-linked funds are subjects to market risks and there is no assurance or guarantee that the objective of the investment fund will be achieved. Past performance of the investment funds do not indicate the future performance of the same. Investors in the Scheme are not being offered any guaranteed / assured results.

Benchmark Indices Provided by CRISIL

The composite indices are computed based on notional Asset Allocation (weights for sub indices) provided by Aviva from time to time. Such weights for the sub indices would impact the return of the composite index. CRISIL does not take responsibility of variations in the returns due to such changes in weights for sub indices. CRISIL indices are sole property of CRISIL Limited (CRISIL) indices shall not be copied, retransmitted or redistributed in any manner for any commercial use. CRISIL has taken due care and caution in computation of indices, based on data obtained for any errors or for the results obtained from the use of the indices. CRISIL especially states that it has no financial liability whatsoever to the users of CRISIL indices.
