- 32.8 Each Unit of the With Profits Fund will have a Selling Price which will be determined by the Company normally on each working day but in any event at least once in every month. The Selling Price will increase as a result of the application of regular bonus rate addition(s) since the Selling Price was previously determined. For this purpose, the annual regular bonus rate announced by the Company will be converted to an equivalent daily rate in accordance with the formula set out below. The equivalent daily rate will then be applied on a daily compound interest basis.

- 32.12 In order to ensure fairness of treatment between policyholders, on the cancellation of Units in a With Profits Fund either on full or partial surrender the Company may reduce the Selling Price by the application of a Market Value Adjustment ("MVA"). The MVA will only be applied where the actual investment return of the With Profits Fund from the date of allocation of that Units to the Unit Account to the date of cancellation of the Units is less than that credited to the Units by the Company by means of increases in the price of Units and by the application of the terminal bonus scale. When applying the MVA, the reduction in the Selling Price will never exceed the difference between the actual investment return of the With Profits Fund and the investment return of the With Profits Fund, credited to the Units by the Company between those dates. The Company will give the Policyholder notice where the MVA is to be applied.
- 32.13 No MVA will be applied in the following circumstances:
