As per the current guidelines issued by the Insurance Regulatory and Development Authority, We will determine the Unit Price of each Fund daily as per the following formula: -
 Unit Price = Net Asset Value ("NAV") divided by the number of Units existing in the Fund at the Valuation Date (before any new Units are allocated or redeemed).
 The NAV can be calculated in either of the following 2 methods:
 - i) **When appropriation price is applied:** The NAV of a Fund shall be computed as the market value of investments held by the Fund plus the expenses incurred in the purchase of the assets plus the value of any current assets plus any accrued income net of Fund Management Charge less the value of any current liabilities and provisions, if any. This is applicable when We are required to purchase assets to allocate Units at the Valuation Date.
 - ii) **When expropriation price is applied:** The NAV of a Fund shall be computed as the market value of investments held by the Fund less the expenses incurred in the sale of the assets plus the value of any current assets plus any accrued income net of Fund Management Charge less the value of any current liabilities and provision, if any. This is applicable when We are required to sell assets to redeem Units at the Valuation Date.
 The Unit Price of Units of a Fund will be rounded by not less than three decimal places.
