 The NAV can be calculated in either of the following 2 methods:
- When appropriation price is applied:** The NAV of a Fund shall be computed as the market value of investments held by the Fund plus the expenses incurred in the purchase of the assets plus the value of any current assets plus any accrued income net of Fund Management Charge and the applicable Service Tax thereon less the value of any current liabilities and provisions, if any. This is applicable when we are required to purchase assets to allocate Units at the Valuation Date.
