MD SPEAK

Dear Customer,

Financial Year 2016 started positively, riding on positive initiatives by the Central Government, better growth and gradually easing inflation.

In the insurance industry, these are some exciting times. The government's decision to hike the FDI limit has certainly set in a certain 'feel good' factor and enhanced customer confidence, and the insurance industry is showing good signs of growth. Hopefully, India's extremely low insurance penetration rate and the insurance industry's contribution to the GDP will see an upward turn.

Globally, debt crisis in Greece, possibility of an economic crisis in China and uncertainty over the timing of the interest rate hike in the U.S. have caused some volatility in the equity market. However, a strong recovery is being predicted with strong levers in place to regain momentum.

Overall, I expect some solid growth both in the life insurance industry and the economy in the next three quarters.

Regards

Trevor B Bull
MD & CEO

Indian equity markets commenced FY16 on a strong note. However, markets corrected towards the end of the quarter. Markets continued to be enthused about gradual improvement in growth, easing inflation and policy initiatives of the Government. However the market correction and volatility was led mainly by Global factors 1) Uncertainty about timing and impact of rate hikes in the US 2) possibility of a default by Greece and its exit from the Eurozone, leading to a contagion effect 3) possibility of a sharp slowdown in growth for China

The quarter on a grim note as applicability of Minimum Alternate Tax (MAT) triggered foreign fund outflows. Selling pressure intensified amid concerns over the impact of retrospective taxation for Foreign Institutional Investors. Markets found some respite in May, as the Government proceeded to resolve issues related to retrospective implementation of MAT on Foreign Portfolio Investors (FPIs). Besides, lower wholesale and retail inflation numbers renewed hopes of a further rate cut by the Reserve Bank of India (RBI). Investor sentiments improved further after HSBC Composite Index for India in both Manufacturing and Services sectors expanded at a faster pace compared to China in April. Bourses also got support after the Chinese Central Bank cut interest rates for the third time in six months. Markets rose further on forecast of timely monsoon and the Government containing fiscal deficit at 4% of GDP for 2014-15.

The potential unfolding of debt crisis in Greece hit the bourses later. Losses were restricted as markets got support during the end of the quarter after concerns over a deficient monsoon eased and key macroeconomic indicators improved. Key benchmark indices, S&P BSE Sensex and CNX Nifty, fell 0.63% and 1.44% during the quarter to close at 27,780 and 8,368 points, respectively. The S&P BSE Mid-Cap gained 0.6% while the S&P BSE Small-Cap fell 1.64%. According to data from the Central Depository Services (India) Ltd, FPIs infused Rs. 2,608 crore in Indian equity markets during the quarter. FPIs were net buyers in April. However, in the subsequent two months they remained net sellers. Among the positive news flow, a global rating agency revised India's sovereign rating outlook from "stable" to "positive". Meanwhile, the RBI cut the repo rate by 25 bps for the third time this year at its second bi-monthly policy review. The RBI's move was in line with market expectations but an increase in inflationary pressures led by expectations of poor monsoons raised worries that the RBI may not effect any more rate cuts in the near future till inflation concerns eases.

A couple of concerns that remained throughout the quarter were the debt crisis in Greece and uncertainty over the timing of the interest rate hike in the U.S. Other factors which damped investor sentiments included a downward revision in the RBI's projection of economic growth for 2015-16 to 7.6% from 7.8% estimated in April. Worries increased further on the back of decline in HSBC Services PMI to a 13-month low

in May, mainly due to fall in new order inflows. A set of positive economic data from the U.S. kept the possibility of a rate hike alive.

On the BSE sectoral front, S&P BSE Energy and BSE Oil & Gas were the major gainers, up 12.3% and 5.9%, respectively. S&P Bankex managed to close the quarter in green, rising by 0.6%. The banking sector continued to remain under pressure due to the asset quality of banks.

Outlook

The Indian economy is amid a macroeconomic turnaround with all major drivers in place.

In the near term markets can be volatile and consolidate, on the back of sharp rally in 2014, given the following near term risks:

- 1) Some of the key bills such as GST bill and Land acquisition bills need consent from both houses of the Parliament. Any delay in the same could affect market sentiment negatively.
- 2) While the Eurozone has implemented quantitative easing measures, delay in recovery of growth could have a negative rub off on the markets
- 3) Markets are still in process of assessing the impact and the timing of hikes in interest rates in the US, which could create volatility
- 4) Poor monsoons could lead to a short term rise in inflation and impact rural income

However, over the coming year and beyond, there are sufficient levers in place for the cyclical recovery to gain momentum and enough scope for a further rally in the equity markets

- 1) The increasing fiscal flexibility has enabled the Government to increase productive spends in infrastructure creation. The increasing share of the State Governments in tax revenues will further create a multiplier effect on growth
- 2) The Government continues to focus on reforms and removing bureaucratic and policy bottlenecks will help to resuscitate growth. The measures taken over the past year would likely start bearing fruit in 2015 and 2016
- 3) Decline in commodity prices has multi fold benefit by keeping fiscal deficit under check, moderation in inflation and also reduces input costs for multiple industries and drive earnings growth, which are not fully captured in current valuations
- 4) With easing inflation, RBI has already cut key benchmark rates, which will further drive earnings growth

First quarter of the FY 2015-16 witnessed a volatile Bond market with yields tracking the geopolitical developments and domestic economic indicators. The quarter began with RBI's monetary policy review in which Central Bank maintained the status quo on the rates in light of lack of expected transmission of previous front loaded rate cuts. Though in June Policy RBI obliged the market and reduced the Repo rate by 25bps to 7.25%. The forward guidance presented by RBI, gave worrying outlook on inflation front- with Jan end CPI inflation forecast revised upwards from 5.8% to 6%.

Globally crude oil prices bounced back after witnessing continuous slump which impacted the CPI numbers adversely. Global bond yields witnessed pressure on account of probable default of Greek debts which added to the volatility in the markets across asset classes. Expected hike in rates by US Fed kept market cautious, though mixed economic data from US made it difficult to guess the actual timing of rate hikes. China's central bank continued to engage in monetary easing, and cut interest rates for the third time since November, last year.

On Domestic front the fiscal deficit (central government) for FY 2015 decreased to 4.0% of GDP vs. 4.4% in FY2014, lower than the target level of 4.1% of GDP. The main reason for the marginally better than expected performance was significantly lower growth in expenditure at 5.5%. Headline CPI inflation numbers remained unfavourable during the quarter and crept towards 5.40% in June from 4.87% in April. Seasonal spike in prices of key vegetables coupled with impact of rise in service tax led to an increase in overall price level. The Current Account Deficit (CAD) narrowed substantially to 0.2% of GDP in the March quarter from 1.6% in the December quarter mainly on account of lower trade deficit.

Prediction of below normal monsoon during the year made the market further jittery on inflation numbers and possible impact on RBI's projected inflation chart. IMD predicted 88% of Long term average rainfall for India.

Government Bond Yields witnessed significant easing in the Shorter End of the Yield Curve with 1 Year Gol yields closing the quarter at 7.68% from 7.88% at the beginning of the quarter. On the contrary the longer end of the Yield curve witnessed Yields moving up by 15-30 bps during the quarter. Benchmark 10Year Gol Yield moved up to 7.86% from 7.74% during the quarter. While the yield on 25Yrs and above Gol moved up by 20-30bps during the quarter.

Outlook

Though domestic economic recovery still appears soft and has room for further easing of rates but the looming FED rate hike and sticky headline CPI will keep the markets cautious in anticipating favourable rate action from the RBI. Against this back drop we expect

the Government Bond Yields to remain range-bound in the short term due to lack of any big drivers for rate cuts.

Disclaimer

Insurance is the subject matter of solicitation. For more details on risk factors, terms & condition, please read sales brochures carefully before concluding a sale. Tax benefits are as per applicable tax laws which are subject to change. Past performance are not indicative of future returns. Unit-Linked Life Insurance products are different from traditional insurance products and are subject to risk factors. The premium paid in unit-linked life Insurance policies are subject to investment risks associated with capital markets and the NAVs of the units may go up or down based on the performance of the fund and factors influencing the capital market. The insured is responsible for his/her decisions. Aviva Life Insurance Company India Limited is only the name of the Insurance Company and the various funds offered under this contract are the names of the unit linked life insurance contract and do not in any way indicate the quality of the contract, its future prospects or returns. Please know the associated risks and the applicable charges, from your sales representative or the Intermediary or policy document issued by insurance company. The premiums and funds are subject to certain charges related to the fund or to the premium paid and there is a possibility of increase in charges. The various funds offered under this contract are the names of the funds and do not in any way indicate the quality of these plans, their future prospects and returns. Unit-linked funds are subjects to market risks and there is no assurance or guarantee that the objective of the investment fund will be achieved. Past performance of the investment funds do not indicate the future performance of the same. Investors in the Scheme are not being offered any guaranteed / assured results.

Benchmark Indices Provided by CRISIL

The composite indices are computed based on national Asset Allocation (weights for sub indices) provided by Aviva from time to time. Such weights for the sub indices would impact the return of the composite index. CRISIL does not take responsibility of variations in the returns due to such changes in weights for sub indices. CRISIL indices are sole property of CRISIL Limited (CRISIL) indices shall not be copied, retransmitted or redistributed in any manner for any commercial use. CRISIL has taken due care and caution in computation of indices, based on data obtained for any errors or for the results obtained from the use of the indices. CRISIL especially states that it has no financial liability whatsoever to the users of CRISIL indices.
